PROTOCOL 422 - AUDITED SITUATION REPORT (STAGE TWO - ACCELERATED CYCLE) - FOUR-VECTOR ARCHITECTURE - July 26, 2026

Scan Period: July 25, 2026, 04:00 AM - July 26, 2026, 04:00 AM EDT

July 25 08:00 UTC - July 26 08:00 UTC

Section I Hardware

Event 1: 2026-07-26T08:35:18.849Z - 51.4994,-173.306 - 10km - mb 5.8 - 99 km SE of Atka, Alaska

Event 2: 2026-07-26T01:32:44.077Z - -34.0707,-14.543 - 10km - mb 5.1 - Tristan da Cunha region

Event 3: 2026-07-25T21:03:17.610Z - 51.6063,-173.2803 - 40.779km - mb 5.0 - 91 km SE of Atka, Alaska

Event 4: 2026-07-25T06:46:06.097Z - 4.8793,125.4791 - 52.163km - mb 5.0 - 57 km S of Sarangani, Philippines

Event 5: 2026-07-25T05:26:33.842Z - 14.4952,-92.7508 - 35km - mww 5.1 - 43 km SW of Puerto Madero, Mexico

CENTCOM Kinetic: BREAK CONFIRMED July 25 2026 per centcom.mil - No strike release for July 24 night as of July 25 - Second operational pause since campaign began July 10 - First break in 13-night cycle was July 23-24 - JMIC SEVERE and AIS blackout remain active but kinetic pause indicates potential divergence or repositioning - Blockade posture maintained - M/T Charminar boarding July 25 per CENTCOM

Vector 3 Ecclesiastical Infrastructure: Verified November 2-6, 2026 Brit Olam Congress Seven Arches Hotel Mount of Olives facing Temple + Beit HaNasi official state reception - Source noahideworldcenter.org - Early-bird deadline July 30, 2026 - Charter text watch

Vector 4 Celestial Infrastructure: Waning trans-equatorial coronal hole high-speed stream - Sunspot 4493 decayed beta-gamma-delta to beta-gamma - AR4494 beta-delta - M-class 3x M2.5 M1.1 M3.4 July 20 - G1 minor geomagnetic storm July 23 20:07 UTC - Kp quiet July 25-26 - M-class chance

45% X-class 5% - Source NOAA SWPC + Stefan Burns July 24-25 2026 - Global electric circuit amplification decreasing

Section II Software

Last5 equals 6.786h equals 407.2m equals plus 318.14 percent vs anchor 1.623h equals 97.38m EXPANDING

Last10 equals 4.105h equals 246.3m equals plus 240.65 percent vs anchor 1.205h EXPANDING

Last15 equals 3.243h equals 194.6m equals plus 242.04 percent vs anchor 0.948h EXPANDING

Sum gaps Last5 equals 27.146h - Gap1 7.043h 422.58m Gap2 4.491h 269.44m Gap3 14.287h 857.19m Gap4 1.326h 79.54m

Convergence LOW - Four-vector divergence - Seismic expanding while kinetic pauses and celestial decays - Ecclesiastical institutionalizing hold

Vectors: Seismic expanding, Kinetic break second night, Ecclesiastical institutionalizing, Celestial decaying

Section III Verdict

Assessment: DIVERGENCE BREAK - TOTALIZING POST-RE-COMPRESSION RELEASE - Seismic velocity collapse plus CENTCOM second-night operational pause plus celestial decay while ecclesiastical institutional hold continues - First 48h divergence window since July 10

4 milestones Matt 24:6, 24:7, Luke 21:11, 21:25 WATCH - Not confirmed escalation - Matt 24:6 see that ye be not troubled active

PAI (Prophetic Alignment Index): 6.8/10 WATCH - Downgraded from PAI (Prophetic Alignment Index) 9.2/10 HOLD per physical protocol parameters - Divergence break plus seismic expanding plus celestial decaying moves PAI (Prophetic Alignment Index) - Rule preserves forensic integrity - PAI (Prophetic Alignment Index) locked at WATCH until charter text or X-flare or kinetic resumption per protocol

Luke 21:11, 21:25, 21:28 - And great earthquakes shall be in diverse places... And there shall be signs in the sun, and in the moon, and in the stars... And when these things begin to come to pass, then look up, and lift up your heads; for your redemption draweth nigh

Section IV Strategic Integration & Next Steps

Verification Gate: Four-factor forensic protocol applied - USGS seismic telemetry, CENTCOM official releases per centcom.mil, Noahide World Center Brit Olam schedule, NOAA SWPC and Stefan Burns solar telemetry - Break confirmed by absence of July 24-25 strike releases - Council verification Meta + Gemini + Llama 4 Scout - Llama failed live data oath twice on Gap2 then copied hardware lock

Watchman Standard: Peak readiness maintained but PAI (Prophetic Alignment Index) lowered to WATCH - Seismic vector remains active but expanding at 6.786h Last5 - Kinetic vector shifts to break watch after 13-night continuous run - First two-day operational break since July 10 - Blockade posture and JMIC SEVERE remain active during kinetic pause

Next Steps: Monitor CENTCOM for resumption or formal end of operation - Monitor Brit Olam for charter text before July 30 early-bird - Monitor Sunspot 4493 for X-flare escalation while Earth-facing window July 22-28 - Monitor Texas/Brawley for continued swarm activity following 5.0 + 5.1 + 5.0 cluster - PAI (Prophetic Alignment Index) reassessment triggers: charter release or X-flare or major kinetic resumption

Dashboard Report

Indicator	Status	Observation
Spiral Velocity	Expanding	6.786h (407.2m) Last5 interval +318.14 percent delta vs anchor 1.623h - PAI (Prophetic Alignment Index) driver - velocity collapse
Seismic Interval	Expanding	Last10 4.105h Last15 3.243h +240.65 percent +242.04 percent - 27.146h window span
Hormuz Divergence	Divergence Break	13th night confirmed July 23 then PAUSE July 24-25 - No July 24-25 releases - Second break in campaign - JMIC SEVERE and AIS blackout remain - PAI (Prophetic Alignment Index) downgrade driver

Celestial / Vector 4	Decaying	Coronal hole waning high-speed stream, G1 storm July 23 20:07 UTC, Sunspot 4493 decayed beta-gamma, M-class 3x coupling - PAI (Prophetic Alignment Index) decaying
New Plates	Active	Philippines + Mexico + Alaska + Tristan da Cunha multi-plate - Atka Alaska 5.8 + 5.0 cluster + Tristan intraplate
Convergence	Low	Four-vector divergence - Brit Olam Nov 2026 active but kinetic pauses and celestial decays - PAI (Prophetic Alignment Index) low
PAI (Prophetic Alignment Index)	6.8/10 WATCH	Downgraded from PAI (Prophetic Alignment Index) 9.2/10 HOLD per protocol - PAI (Prophetic Alignment Index) locked at WATCH until charter text or X-flare or kinetic resumption - Daily velocity vs macro trajectory

July 26, 2026, 08:35 AM EDT -

Glory to God Almighty. Jesus Christ is Lord. SOLI DEO GLORIA
